Our Strengths

Our Strengths

Right Value.
Best Fit.
Sound operation.

“Longevity” is not a word often associated with technology, but it’s CS Lucas’ calling card.

With 25 years doing nothing but treasury risk systems, we’ve developed wide and deep experience.

Without fail, our expertise delivers secured performance and value for our clients. It can do the same for you.

Longevity

25 years old, and still management-owned.

We keep a conservative eye on risk and take a long-term view on client relationships.

And so for your peace of mind, we offer a full-feature trial for evaluation, provide access to user guides, and publicise our subscription rates.

Indeed, transparency saves everyone time and money, and it’s rewarded us well with sustainable profitability over many years. We’re confident that you’ll love working with us, too.

Management Heritage

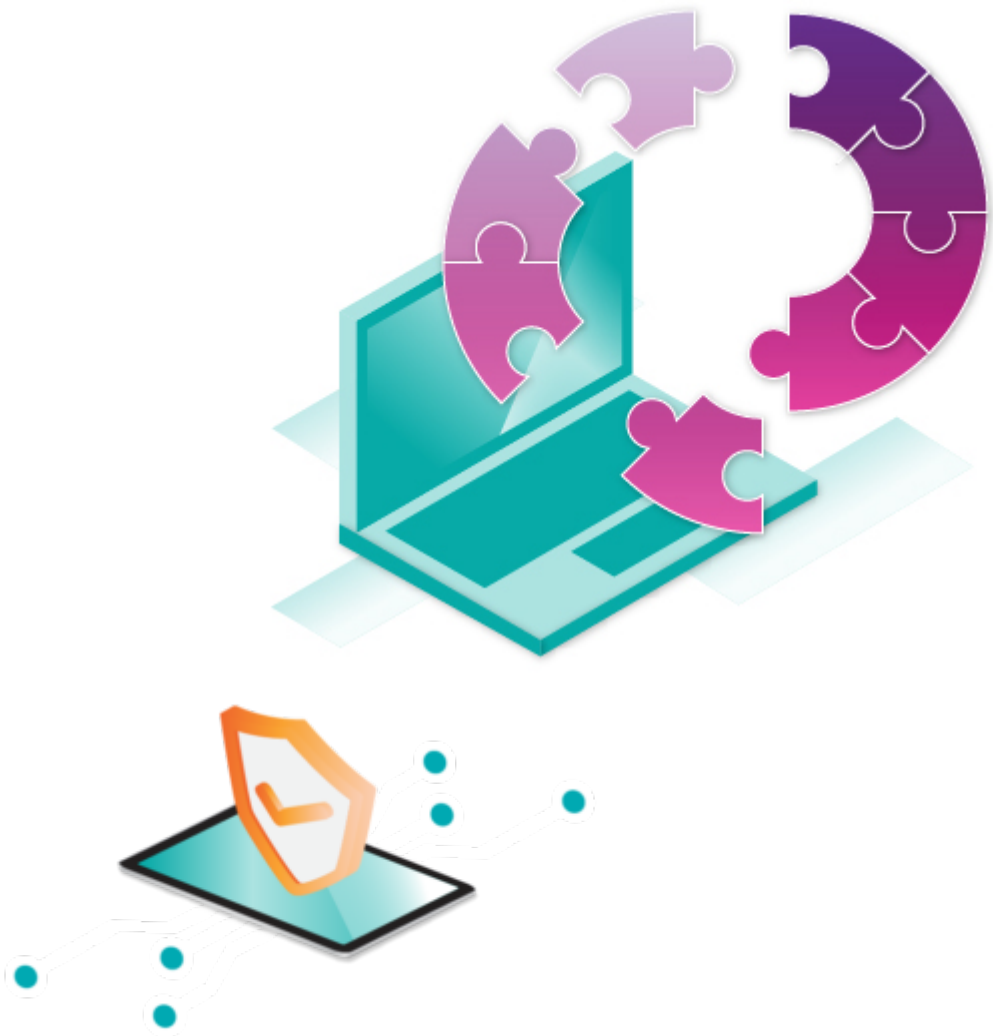
CS Lucas' senior management have graced this company for over 13 years—experience that's been key to driving client success. Our management team have installed CS Lucas systems in over ten countries. They're true experts at managing and resolving technology and usage issues.

We invest heavily in our workforce because we know that workforce stability is critical for client success. There are no shortcuts to building the experience and deep domain knowledge that help our clients navigate the complex and ever-changing technology landscape.

Product-Led Success

Good products drive business growth. Hence, product research and development (R&D) constitutes over 75% of our payroll—*more than three times the industry average.*

That’s why we can keep building better, more intuitive features that boost productivity and keep clients ahead of technology and regulation curves. And with CS Lucas’ exceptional commitment to R&D, our products remain secure in the face of increasing cybersecurity threats.



Security

In today’s climate of cyber threats, security is paramount. You can rest assured that with us, your data will be safe.

Our processes not only comply but are independently audited to meet the ISO 27001 Standard for Information Security. And our system is protected by robust measures that are as good as—if not better than—many of those from the largest global financial institutions in the world.

To stay at the forefront of security, we rely only on partners whose operations strictly observe stringent security best practices and comply with industry assurance programs.
