Our Partners

CS Lucas works closely with partners to drive innovation and deliver high-performing,
secure, and reliable software services for our clients.

IBM

As one of the world’s largest information technology companies, IBM boasts a long history of leadership in helping businesses think outside the box.

The CS Lucas solution is built on the IBM Db2 Data Server and WebSphere Application Server to ensure performance and security. As an IBM partner, we can access IBM Innovation Centres to constantly innovate and strengthen our services.

“CS Lucas’ commitment to SaaS can provide its customers with a powerful way to reduce implementation costs while rapidly deploying business applications.” – Dave Mitchell, Director of Strategy, IBM Developer Relations

Amazon Web Services

With data centres across the globe, Amazon Web Services (AWS) is the most comprehensive and broadly adopted cloud platform. It serves some of the largest enterprises and leading government agencies in the world. We rely on AWS global secure infrastructure, storage, networking, database services, and security services.

The CS Lucas solution is distributed as a software service from AWS data centres located all around the world, such as the U.S., U.K., Dublin, Singapore, and Australia. These hosting operations are aligned with stringent best practices and comply with numerous assurance programs, including SOC1,2, 3; and ISO 27001, 27017, 27018.
