

CS Lucas ISO27001 recertification

We are pleased to announce that the company has successfully renewed its ISO27001 certificate from 19 Sep 2022 to 8 Sep 2025.

Maintaining our ISO 27001 certification is of great importance to us. The team at CS Lucas works hard to ensure we are following the international security standards that our customers and partners expect from our Treasury Management System. We offered a transparent look into the working processes of our Security Management Systems to provide objective evidence that we conformed with the requirements of ISO/IEC 27001:2013 standards.

At CS Lucas, we take the risk of cyber security threats and the need to ensure business continuity is maintained seriously. We strive continuously to provide our customers with secure technology delivered with repeatable and auditable processes.

Lyra Tolentino, CS Lucas HR and Office Manager, says, “Work-life post-pandemic has changed significantly with more remote working and online web meetings. While we welcome all these changes heartily, we are also aware of the changes they pose to data security and privacy.”

About ISO/IEC 27001:2013

ISO/IEC 27001:2013 specifies the requirements for establishing, implementing, maintaining and continually improving an information security management system within the organisation’s context. It includes provisions for assessing and treating information security risks tailored to the organisation’s needs.
