

On-Premise License

Functionality On Premise License

WHEN YOU NEED TO KEEP IT WITHIN THE FAMILY

Professional Support for Installation

With an on-premise license, companies can choose to install the CS Lucas financial solution within their own IT infrastructure. Companies with strict corporate security protocols and IT policies can adopt this deployment model as it allows:

- full control and validation of all third-party software
- all company data to be kept behind the corporate firewall

CS Lucas' team of experienced and professional specialists will be on hand to assist with the installation of the financial solution within your in-house data centre. Having carried out multiple installations throughout Asia and across different business environments, CS Lucas is able to ensure a smooth and successful implementation, whatever the policy requirements or network deployment environment.

With years of experience keeping customer deployments running smoothly, you can also count on CS Lucas to provide professional and reliable after-sales support for the operation and maintenance of the system.
