

Webinar: Price Feeds

Webinar: Price Feed

Webinar Outline

At CS Lucas, we know that accurate and timely market prices are integral for effective treasury management. Stale and incorrect prices result in inaccurate cash forecasts, wrong valuations, and incorrect accounting. The consequence is poor decision making with adverse financial consequences. This webinar discusses:

- Market prices

- The source of market prices

- Where the price feeds used by the CS Lucas TMS are

- Alternative approaches to price feed integration

This webinar was recorded on October 9 and hosted by our Senior Application Specialist, Veena Kunummal.
