

CNY Intercompany Loan to Entity in China

[See the previous W5 version guide.](#)

PURPOSE

To illustrate how transactions should be booked in the system to reflect a CNY loan to a Chinese entity from CNH funds held by an intercompany outside China.

WHY IS THIS IMPORTANT?

Entities outside China may have balances in CNH which is not available for transactions in China; loans made to Chinese entities must be denominated in CNY. Consequently, foreign entity with available CNH balances intending to lend to a Chinese entity needs to convert CNH to CNY when such loans are made. This requires a currency conversion through FX module.

These instructions shows how the FX and loan transactions are booked and the required set up to correctly account for the settlement.

NOTE

In this guide, TFS-SG is the lending entity based in Singapore and TRW-CN is the borrowing entity based in China.

SET UP REQUIRED

Set up in the TFS-SG (lending entity) a “clearing” CNY SSI for TRW-CN (borrowing entity).
