3. Fill in the mandatory fields characterized by the asterisk (*) symbol.
4. Accounting centre would have been defaulted to the user's accounting centre. If not, it would be left blank. Select the proper Accounting Centre from the dropdown.
5. Input the transaction date in the TDate field. It is defaulted to the system date. You may change it to an earlier date.
6. Enter the value date in the VDate field. The VDate must be on or after the TDate.
7. In the Transaction field, select Buy or Sell. In this example, Buy will be selected.
8. Select the transaction currency from the dropdown in the Ccy field. In this

example, USD will be used.

9. Input the transaction currency amount.

10. In the Against Ccy field, choose the currency that will be exchanged for the chosen currency in the Ccy field. In this example, SGD will be used.

11. Enter the Spot Reference Rate.

12. Enter the forward points, if any, for forward contracts. For spot FX, leave the forward points as 0.

13. Click on the Recomp button next to the Countervalue field. The system automatically computes for the Contract Rate and Countervalue.

14. Next, click on the Recomp button next to the Facility field. This will populate the facility in the drop down list.

15. Select the preferred facility from the dropdown. As you do this, the system will recompute the available limit for the facility chosen, and the trade counterparty will be populated in the Counterparty ID field.
