

# Duplicating Risk Profile (W5)

[This version is superseded. Click here to view the latest guide.](#)

## **PURPOSE**

This document shows the detailed procedure of duplicating a risk profile.

## **WHY IS THIS IMPORTANT?**

This allows risk profiles to be duplicated if you have a number of similar risk profiles. It provides a quicker way for setting up risk profile.

## **PROCEDURE**

1. From the main menu, click Set Up > Risk > Risk Profile.

The screenshot shows a web form titled "Risk Profile Maintenance". At the top left is a "Save" button. Below it is a label "New Risk Profile" followed by a yellow dropdown menu. Below the dropdown is a table with two columns: "Profile Description" and "Type". The first row of the table has "Alt Security Type" under "Profile Description" and "Choice" under "Type".

Profile Description	Type
Alt Security Type	Choice

2. Click on the profile description that you wish to duplicate. In this example, "Issuer Group".
3. The risk profile details will be populated at the bottom of the table listing.

The screenshot shows a form with a "Description" label and a text input field containing "Issuer Group". To the right of the input field is a "Duplicate" button. Below the input field is a "Selection/Choice" label and a "+" button. Underneath are two input fields: the first contains "CAPITALAND" and the second contains "SEMBCORP".

4. Click Duplicate to duplicate the risk profile.
5. Newly duplicated risk profile will have {1} appended. In this example, "Issuer Group{1}".
