

Webinar: How to make the Move from Spreadsheets to Treasury Management Systems

Digital landscapes make dealing with payments, across multiple currencies and banking relationships easier to visualize and quicker to execute. In order to fully utilize the speed digitization offers, we need to say goodbye to manual spreadsheets and move towards Treasury Management Systems that support total cash visibility, seamless connectivity and securely hosted data.

In this webinar, CEO of CS Lucas, CS Tan – makes the case for Treasury Management Systems and showcases our new free TMS solution: CS Lucas Essentials.
